Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Benefiel et al. in view of Spangrud et al.

Benefiel et al. disclose a beverage dispenser comprising a semi-rigid hollow straw having two open ends, the straw having sidewalls with a minimum thickness and the straw being substantially open from end to end, and removable end caps 36 on each of the two open ends, and the dispenser being filled with an agent 20. Benefiel et al. do not disclose the thickness of 0.02 inch, the beverage as recited, or the method of using the dispenser as recited. Spangrud et al. teaches a beverage dispenser comprising a straw having sidewalls with a thickness of about 0.035 inch. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Benefiel et al. by making the sidewall thickness to be a minimum thickness of 0.02 as taught by Spangrud et al. in order to form a more durable dispenser. Regarding the method of using the device, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations and the types of beverages as recited would have been a

matter of design choice since such a modification would have involved a mere change in the agent of Benefiel et al., which is generally as being within the level or ordinary skill in the art.
